## About Your Page Today

**Your Page Today** designs and develops high quality custom built web sites. We specialize in custom web design, custom web site redesigns, search engine optimization, custom logo and print design, web site maintenance, e-commerce, catalog web sites & much more!

**A good client for us would be** a business owner interested in a CUSTOM on line presence. What do we mean by custom? Custom is when their web site is designed and developed from scratch, NOT utilizing a template. Custom design and development is normally more costly then a templated web site. Why? Because a templated web site will look like a million other web sites already on line...with a custom built site, their web site will be unique to who they are what they offer.

**What types of business are good referrals?** Commercial, industrial, manufacturing, attorneys, insurance agencies, we prefer service industries, and medium to large size companies.

**How long does it take from start to finish?**  
 On average, one - two months
